OBJECTIVE

Pre-final year B.Tech CSE student and AI-powered builder who ships real products using Python, LLMs, and modern tooling. Built computer vision systems achieving <100ms real-time latency, prototyped hyperlocal commerce platforms, and delivered end-to-end data analytics solutions. Seeking product-based company and MNC roles where speed, ownership, and AI literacy matter.

EDUCATION

B.Tech — Computer Science & Engineering

2023 – 2027

Arya College of Engineering & IT, Jaipur

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS, Java (basic)

AI / ML / CV: MediaPipe, OpenCV, NumPy, Pandas, Scikit-Learn, PyAutoGUI, TensorFlow (learning)

Generative AI: Gemini API, Imagen, Vertex AI, Prompt Engineering

Cloud & Infra: Google Cloud Platform, AWS (basics), Vercel, Flask, REST APIs

Web & Backend: React, Node.js (basic), Selenium, Spring Framework (basic), Apache Kafka (basic)

Tools: Git, GitHub, VS Code, Figma, Jupyter Notebook, Tableau, Excel

EXPERIENCE

Data Analytics Intern

2024

Codveda Technologies

Remote

- Delivered end-to-end exploratory data analysis on real-world datasets using Pandas and NumPy — covering raw ingestion, cleaning, transformation, and actionable reporting.
- Built 3+ visualization reports translating statistical findings into business-readable charts and trend summaries for stakeholders.
- Met deliverable timelines consistently and incorporated feedback across multiple project iterations in a professional team environment.

PROJECTS

Finger Mouse — Real-Time Gesture-Controlled Virtual Touchpad

2024

Python · MediaPipe · OpenCV · PyAutoGUI | github.com/Godgiftedevil/Finger-Mouse

- Engineered a 21-landmark hand-tracking pipeline using MediaPipe achieving <100ms real-time latency across varied lighting with zero external hardware dependencies.
- Implemented 5 gesture modes — cursor movement, left/right click, drag-and-drop, and two-finger scroll — with independent conflict resolution and smoothing algorithms.
- Shipped as an installable open-source project; sole developer handling architecture, algorithm design, testing, and GitHub documentation end-to-end.

CampusMart — Hyperlocal Quick-Commerce Platform

2025

React · Node.js · UPI Integration · REST APIs

- Designed and prototyped an on-demand delivery platform for college campuses with flat ₹10 delivery fee, UPI-based payments, and same-hour delivery.
- Architected vendor onboarding, student storefront, order tracking, and payment confirmation flow solo using AI-accelerated development.

BlockShare — Blockchain-Based Decentralized File Sharing Demo

2025

Python · Solidity (basics) · IPFS Concepts · Web3

- Built a proof-of-concept for decentralized file sharing using SHA-256 hashing, Proof of Work, and immutable transaction records — demonstrated at a college technical event.

CERTIFICATIONS & JOB SIMULATIONS

- Data Analytics Job Simulation — Deloitte Australia x Forage | March 2026
- Software Engineering Job Simulation — JPMorgan Chase x Forage | 2024
- Solutions Architecture Job Simulation — AWS x Forage | December 2024
- Build Real World AI Apps with Gemini and Imagen — Google Cloud Skill Badge | April 2025
- Prompt Design in Vertex AI — Google Cloud Skill Badge | April 2025
- Encoder-Decoder Architecture — Google Cloud | September 2024
- AI for You: Training and Assessment — Oracle | 2024

LEADERSHIP & ACTIVITIES

- Runner-Up, Inter-College Weightlifting Competition — performed under competitive pressure, demonstrating discipline and consistency.
- Mr. Fresher Runner-Up — recognized for confidence and communication among 300+ participants at a college-wide competition.
- Junior Mentor & Event Coordinator — trained incoming students in technical events and managed 100+ participant college-wide programmes.
- Open-Source Contributor — maintains public GitHub repositories with README documentation, version history, and installation guides.
